NOTE FOR: The Director

STAT This report to you from the EEO Advisory Panel covers a variety of topics they addressed at a recent retreat [redacted] Almost all of the subjects they took up were as a result of areas of attention suggested by you and me in conversations with the panel earlier this year. I met with the panel at the end of their retreat; went over each and everyone of the topics; suggested some modifications in their approach; strongly supported some of their suggestions; and asked that they let me have more detailed ideas and suggestions in due course.

Altogether the vibes were very good. The panel remains devoted to the proposition that much remains to be done, but I do think it senses our new directions and it seems to me to be less strident than it was in the past.

I leave it to you to decide whether or not to hear from the panel personally. But, my recommendation is to await our receipt of further details before doing so.

*E. H. Knoche*
